2 usages

```
public class AdministrativeEmployee extends Employee {  
  
    // public double doSomePaperWork() {  
    //     // TODO - implement AdministrativeEmployee.doSomePaperWork  
    //     throw new UnsupportedOperationException();  
    // }
```

1 usage

```
public double doSomePaperWork(){  
    Scanner scanner = new Scanner(System.in);  
  
    System.out.println("Введите количество документов - ");  
    int doc = scanner.nextInt();  
  
    System.out.println("Введите количество документов, обрабатываемых в день - ");  
    int speed = scanner.nextInt();  
  
    return (double) doc / speed;  
}  
  
}
```

```
C:\Users\pavel\.jdk\openjdk-21.0.1\bin\java.exe "-javaagent  
Введите количество документов -  
35  
Введите количество документов, обрабатываемых в день -  
5  
Количество дней на бумажную работу = 7.0 дней.  
  
Process finished with exit code 0
